

DHANWANTHBALA S

Aspiring web developer and ai enthusiast

ghanwanthb@gmail.com

Mobile No: +91-9629324204

CAREER OBJECTIVE:

I am a passionate and motivated Computer Science student with a strong interest in full stack development, cloud technologies, and software development. I enjoy learning new technologies and building practical projects that improve my problem-solving and technical skills.

With knowledge of programming languages such as Python, html , css and JavaScript, I am continuously enhancing my understanding of coding concepts, application development, and modern development tools. I am eager to work with innovative teams, gain real-world experience, and grow into a skilled software developer capable of creating efficient and impactful solutions.

EDUCATION:

M.Tech in Computer Science Engineering

Sri Krishna College of Engineering and Technology(SK CET)

CGPA : 7.89

HSC – 92% , SSLC -90%

SKILL SUMMARY:

TECHNICAL:

Languages: C++, Python, java script, java , SQL

Web Technologies: HTML, CSS, MySQL, React , Node,

Tools & Platforms: Git, VS Code, MySQL Workbench , Firebase

Domain Interests: Full Stack Development, cloud technology

Currently learning : Android Studio

PROJECTS:

MediVault AI – Biometric Smart Healthcare Record System:

Used : Python, React Native, Node.js, MongoDB, SQLite, TensorFlow, OpenCV, Firebase, Biometric Authentication, Offline Database Synchronization, AI/ML

Developed an AI-powered healthcare application that securely accesses patient medical records using fingerprint and retina authentication during emergencies and critical situations. The system allows doctors to instantly retrieve medical history, allergies, medications, and treatment details for faster and accurate healthcare support, even without an internet connection.

Integrated AI-based medication reminders, health predictions, automated medical charts, and emergency alert features that notify the patient's trusted contacts or family members during accidents or medical emergencies. Implemented secure offline data storage and authenticated biometric access to ensure privacy, reliability, and continuous healthcare availability.

IntelliDesk Assistant :

Python · Voice Recognition · System Automation

- Engineered an AI-powered desktop assistant to manage applications, files, and system operations using voice commands
- Built intelligent automation workflows to simplify repetitive daily tasks and improve user productivity
- Developed real-time speech processing and command execution mechanisms for responsive interaction
- Structured the project with scalable modules to support future integrations and advanced AI capabilities
- Optimized assistant performance for faster response time and smoother user experience

AREAS OF INTEREST:

- Software Development
- Web Application Development
- Mobile App Development
- Cloud computing
- Ai analytics

ACHIEVEMENTS :

- Won Technical events a Ramakrishna college – demonstrated problem solving and web development
- Secured prizes in competitions at KPR College – recognized for technical and thinking skills

PROFILES:

LinkedIn: <https://www.linkedin.com/in/dhanwanth-bala-a686a7327/>

Github: <https://github.com/DHANWANTH01>

INTERSHIPS:

Web Development Internship
Thiranex – full stack (remote)

DECLARATION:

I hereby declare that the information provided is true and correct to the best of my knowledge .
